It can be easy to "miss" what's under our feet, but not in the case of the fabulous marble floors of Italy-which lend themselves to stunning patchwork. This slide lecture and trunk show is based on my book, published in Fall 2005 by C&T, which examines these multifaceted designs and, using simple techniques, puts them within reach of most quilters. These floors inspire a new approach to sampler quilts that allows secondary patterns to be explored. The distinctive bands lend themselves to use in appliqué quilts as well. The possibilities are endless. (slide show with trunk show of quilts).
